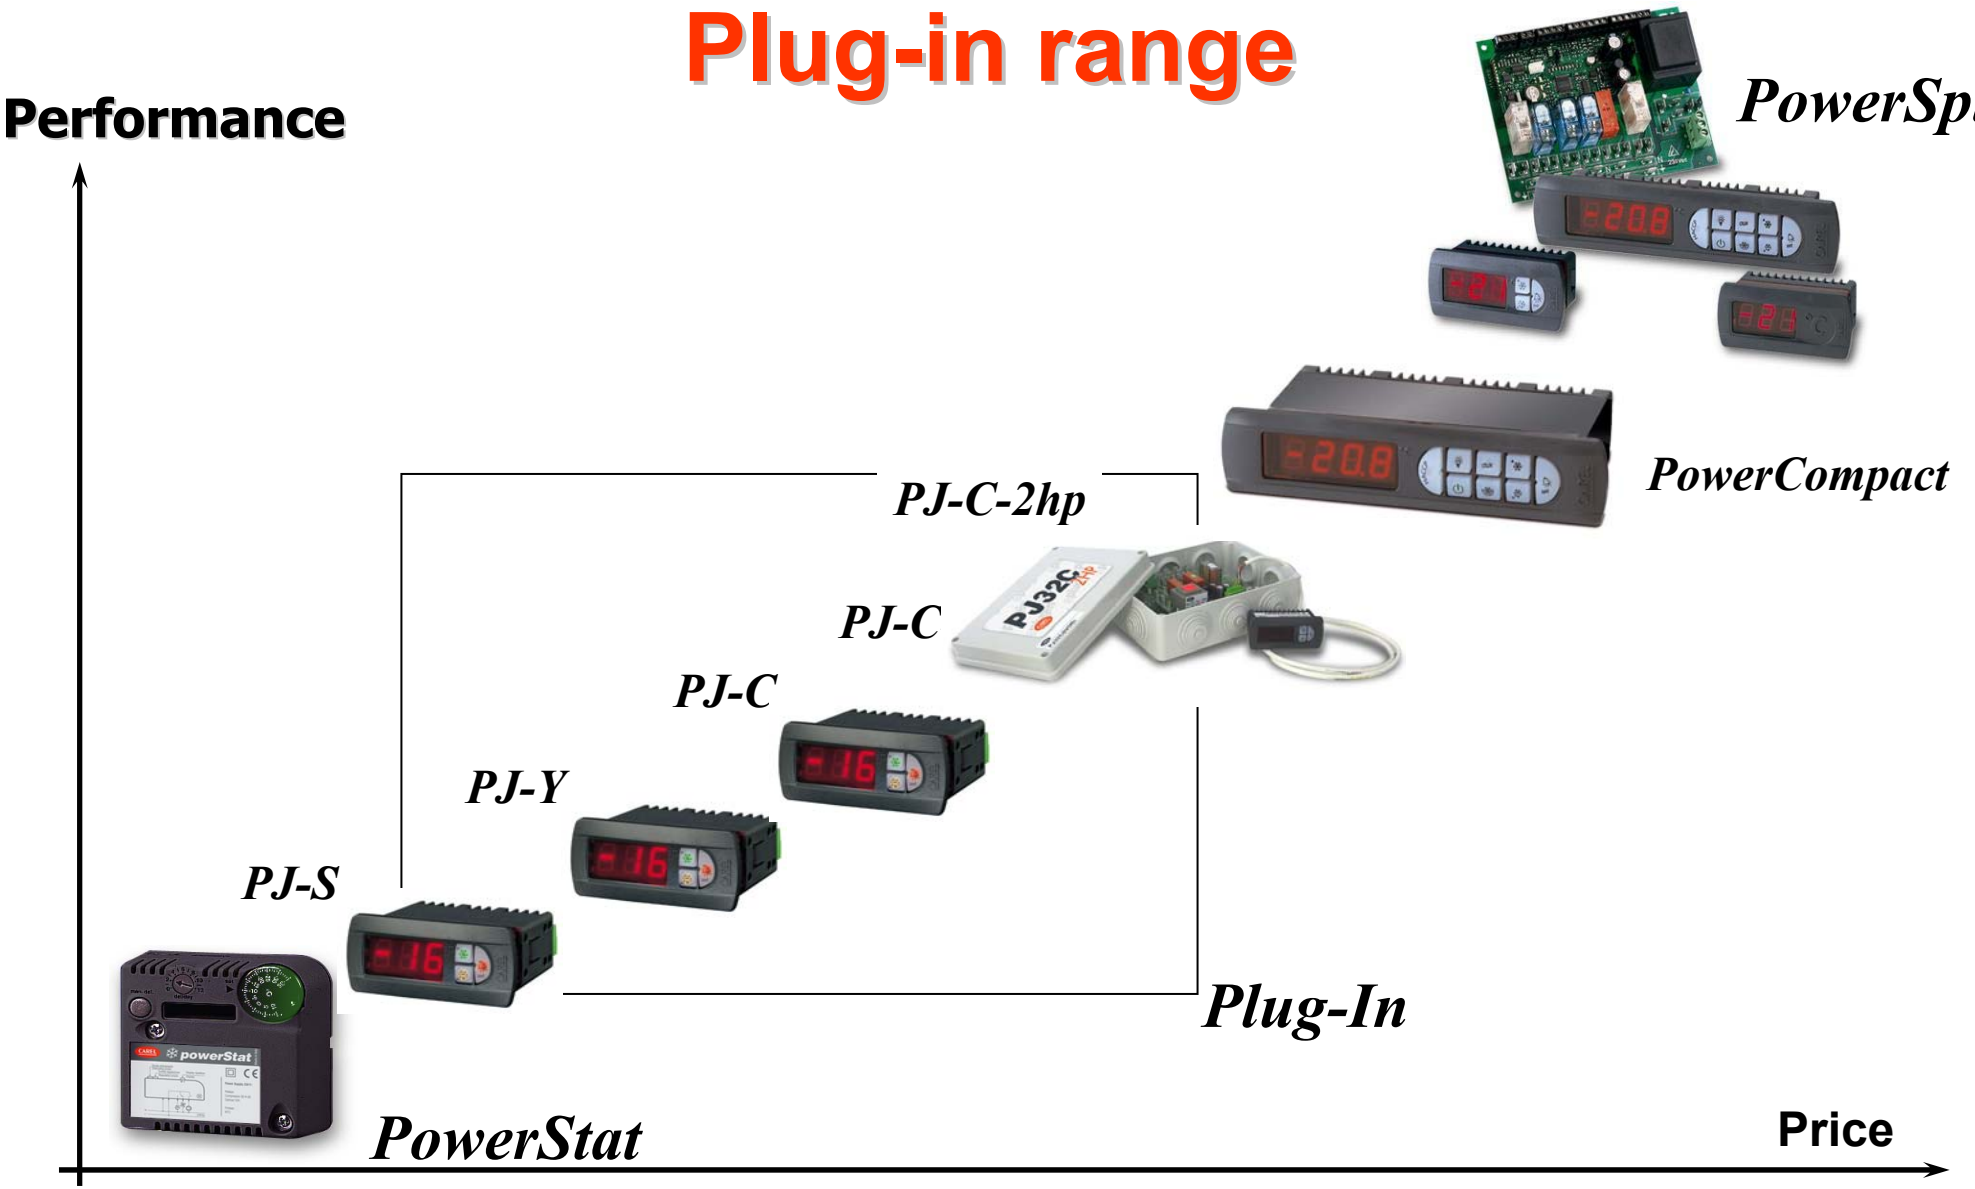
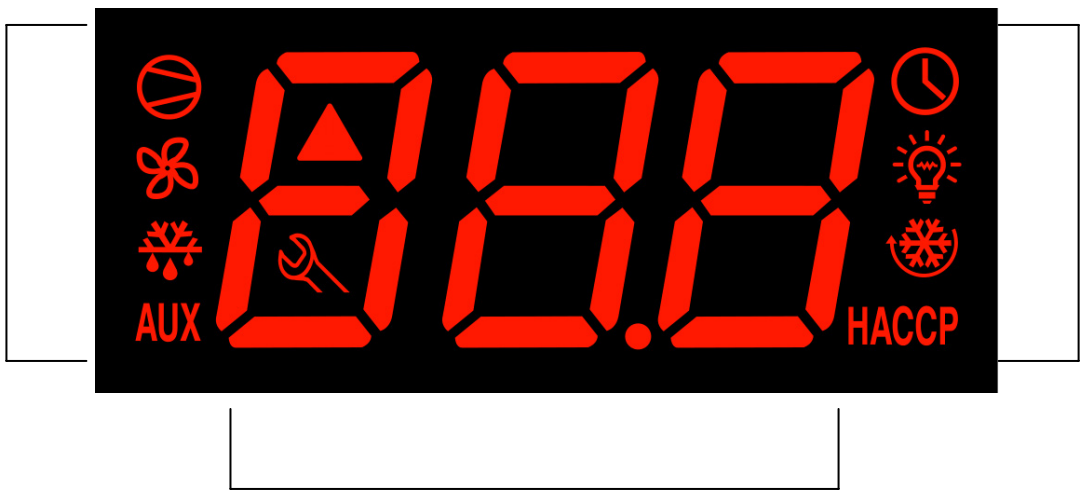
product presentation

Plug-in range



powercompact: new display

Output status



Operating mode

Highly brightness LED

powercompact: main Hardware features

1. New controllers range from 2 up to 5 digital outputs
2. 2 Hp relay models for the compressor
3. 2 NTC probes +2 digital inputs/probes
4. Direct power supply 230 Vac
5. Models fitted with internal switching power supply in order to
   - ✓ increase the power and reduce the waste of heat
   - ✓ permit direct wide range power supply from 115 to 230 Vac
6. Terminal board model available: choose faston/removable or fixed terminals

powercompact: Software features

1. Condensation fan management
2. Second evaporator management
3. HACCP functions
4. Pump-down
5. Digital inputs configurable as NTC probes
6. Keypad functions block: can be completely customized
7. Easy parameter configuration: standard or through the category name
8. Defrost management by real time clock
9. Selection mode of defrost management type with intervals variables according to previous defrost time duration

powercompact: accessories

✓ **Second display** for the versions with switching power supply

✓ Additional RS485 serial board that can be added for all models

✓ Models fitted with clock board allowing defrost in real time

✓ Programming key

✓Remote control infrared sensor

Market remarks

We deal with two different market types with different technical needs, support modes, volumes and price levels

OEM

- ✓Big volumes
- ✓Basic performances
- ✓High competitiveness
- ✓Frequent need for customisation

Wholesalers

- ✓Limited volumes
- ✓Standard products
- ✓High performances
- ✓Plus compared with the determinant competitors

What do we want to achieve?

We want to become market leaders.

Now it's high time to think about something new.

Thanks to IR32.

Ir32: Success factors

Green LED: more attractive, distinguishing if compared to the competitors' products

4 relays, 2 programmable digital inputs, optional serial

Ergonomic keypad

Innovative and pleasant aesthetic

IR33: next steps

Then new IR33 is a basic platform to develop new product ranges

Phase 1

Phase 2

Phase 3

Plug-in range

powerCompact: models and placing in the market

Performance

Top

115/230 Vac - Switching

PB00F0HA00 4 outputs (16 comp, 8 def)
PB00C0HN00 4 outputs (2Hp comp, 16 def)
PB00C0HB00 4 outputs (2Hp comp,16 def,RTC)
PB00H0HN00 5 outputs (2Hp comp,16 def)
PB00H0HB00 5 outputs (2Hp comp,16 def,RTC)

230 Vac – Trasformer

Basic

fixed

PB00S0EA00 2 outputs
PB00F0EN00 3 outputs

Faston

PB00S0EA10 2 outputs
PB00F0EN10 3 outputs

Comp=compressor def =defrost RTC=real time clock

Price

The range

This product has been designed to complete the range of plug-in family, which have met a great approval in an interesting sector such as the catering industry.

Family feeling

1. According to Carel the design has always been a decisive factor in the development of new products.
2. The plug-in range combines a pleasant appearance and high performances required by the user.

Family feeling & Customisation

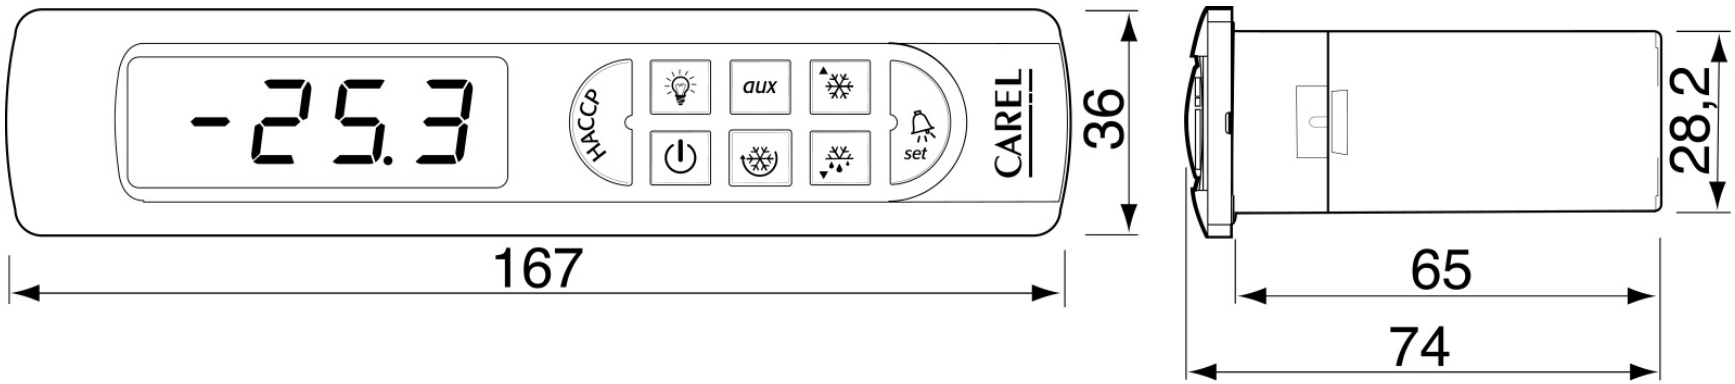
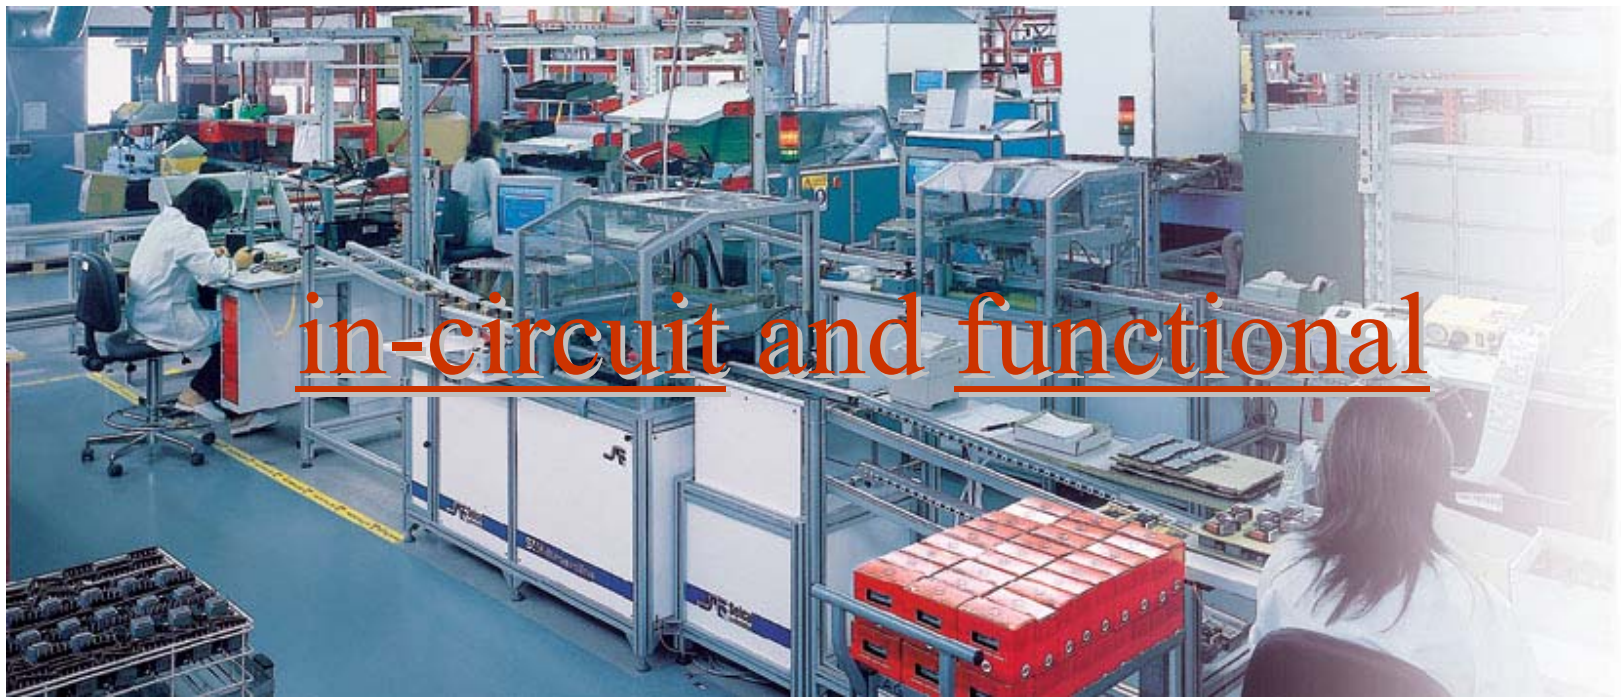
powerCompact: dimensions



Test, quality, reliability

100% of Carel production is submitted to two tests:



- in-circuit and functional

From where have we started?

1. IR32 has been having a great success
2. Its characteristics has always been rewarded by the market
3. The new product will be destined mainly to the distributors and medium OEMs
